

Reclaimed Greenheart Scar'dFace Flooring

March 1, 2009

product information

Greenheart is currently a threatened specie of evergreen that grows in South America; by definition it is a softwood, but it is very hard and durable which is why it was used for the decks in rail cars; the regular bolt hole pattern creates visual interest in a palette of brown, tan and gold toned wood; the fine grain flows smoothly from one board to another and there is very little character aside from the intense hole pattern; it is a great wood for commercial, retail or restaurants

specie

Greenheart (*Chlorocardium rodiei*)

source :: antique 100% recycled decking from railcars

moisture content

kiln-dried to 6-8% moisture content

hardness

janka hardness rating: 2350

character rating

our character rating: 6.5 (rustic elements)

our character scale rates floors on a 1 - 10 scale; a low number is a refined floor and a high number is very rustic

grade scope

unless otherwise stated the grade standards apply to an entire floor and not to individual boards which allows for a more natural look even in the refined products

knots

generally there are very few, if any, knots

holes

a heavy pattern of small bolt holes with ferrous bleed

cracks/checks

much of the desired character of this product comes from checks in the surface of the boards

so an unlimited amount of checking is allowed; cracks through the thickness of the board are allowed as long the board is stable enough for nail down installation

color

the color variances are unlimited, but predominately range from nutmeg brown to tan, to dark brown

grain

the majority of the wood will be flat or cathedral grain; some rift cut or quarter sawn boards may be included

millwork

$\frac{3}{4}$ " thick; the tongue and groove will be milled on the edges; the back of the board is milled with back outs; the ends of the boards will be cut square

widths

3" face width

lengths

about 3'

surface

the face is planed smooth, but will still have variances from checks and bolt holes

installation

basic principles of installation for solid wood floors apply to this product and it should be installed according to the standard professional practices of your area; although, installers should be well experienced with custom wood floors and have artistic skill in board placement

unfinished

this flooring product comes unfinished and is designed to be prepped and finished on site
